

# Wider Subject Choice

Curro values each learner's unique interests and life goals, empowering them to pursue their passions. With our innovative approach to education through our wider subject choice offering, Curro Choice, we offer a range of diverse subjects to all Curro high school learners in order for them to customise and personalise their educational journey.

## GEOGRAPHY

**Available to:**

Grades 10 to 12 learners (IEB and NSC)

### AN OVERVIEW

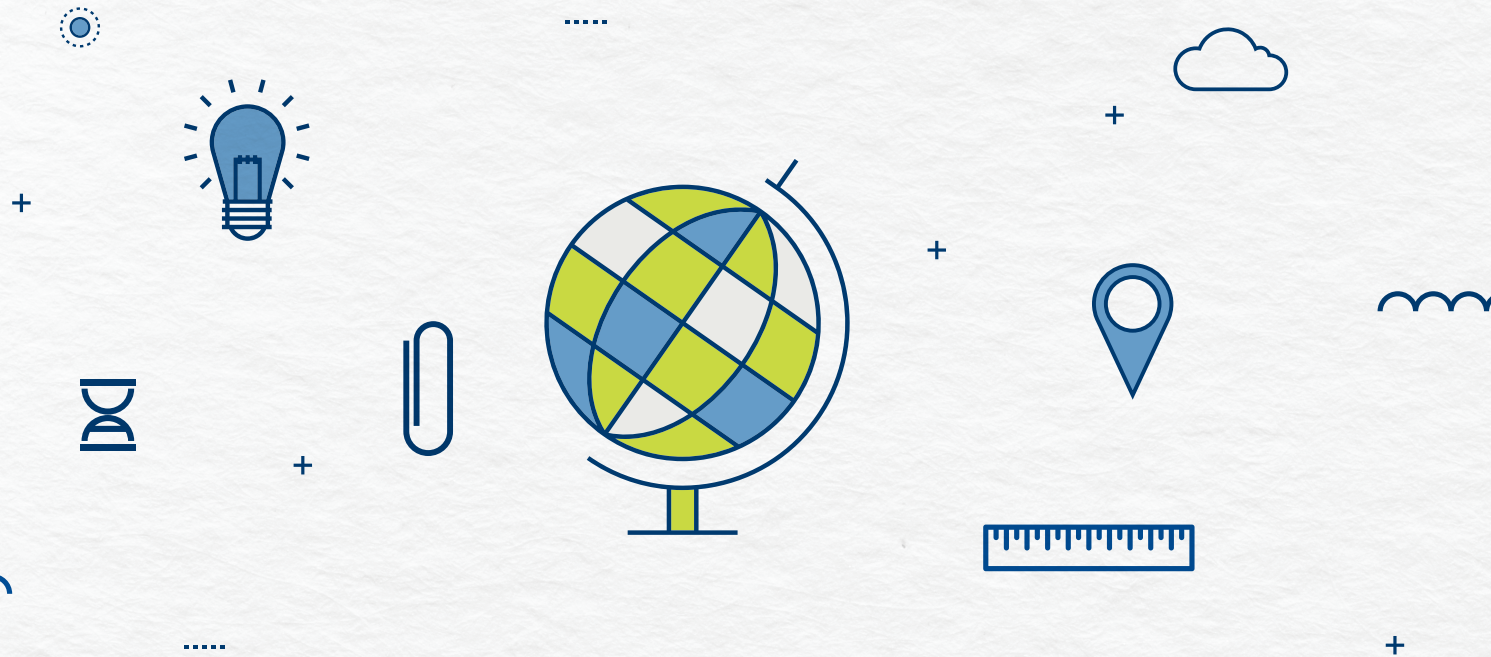

Geographers seek to understand where things are, why they are there and how things will change in the future. If you are interested in problem-solving and are curious about how the world works, then Geography is a good subject choice for you. It is a hands-on-approach subject which requires in-depth study, research, skills development, and the acquisition of knowledge and understanding.

### CAREER PATHS

The study of Geography will stand you in good stead for the following careers: teacher, pilot, engineer, meteorologist, cartographer, architect, city and town planner, geomorphologist, economic development officer, GIS specialist, game ranger, market research analyst, tour guide, conservation officer, environmental consultant, surveyor, logistics manager, remote sensing specialist, geospatial analyst, urban designer and politician.

## WHAT YOU CAN EXPECT FROM THIS PROGRAMME

Geography is the study of the physical and human environment. Physical geography focuses on land, water, atmosphere, and the interior of the earth. Human geography, on the other hand, focuses on the influence humans have on the earth – taking a close look at development, politics, urban areas, agriculture, economies, and population. Geography helps us to understand our complex world. The subject offers us a bridge between the human sciences and physical sciences.
