AN OVERVIEW

Economics is the study of how individuals, businesses, governments, and other organisations within our society choose to use scarce resources to satisfy their numerous needs and wants in a manner that is efficient, equitable and sustainable. It covers topics such as market forces, supply and demand, government intervention, exchange rates, imports and exports, inflation, unemployment, development, and government policy.

CAREER PATHS

Economics draws on a wide range of skills and provides an excellent background for those considering careers in business, banking, accounting, law or politics (although Economics is not a prerequisite to study towards a Bachelor of Commerce degree).

+

WHAT YOU CAN EXPECT FROM THIS PROGRAMME

If you have an interest in current, national and international affairs, you will find the subject stimulating. Economics prepares you to live in a world where you are constantly forced to make choices and to think critically about what is happening in South Africa and globally. In Economics you are taught to be critical of the environment and equipped with the skills to analyse your choices and make educated and informed decisions.
